The future of altruistic medicine

Living Donor Advocacy

An Evolving Role Within Transplantation

Steel, Jennifer (Ed.)

Springer

2014, XV, 362 p. 53 illus., 25 illus. in color.

Living Donor Advocacy is an overview of living donation and its risks, ethical challenges and future directions regarding this role within the transplantation process. This book provides health care professionals or consumers of health care with information that facilitates their understanding of the complexity of the living donor surgeries and medical contraindications, evaluation of the donor, and bioethics involved in living donation. Living Donor Advocacy brings the fragmented information in the literature together into a single, invaluable resource for health professionals and those undergoing transplantation or living donor surgery.
