## Livres/Books

### ***Marginal Donors: Current and Future Status***

Editors: Takehide Asano, Norihide Fukushima, Takashi Kenmochi and Naoto Matsuno. Springer, 2014.

This book, prepared by distinguished authorities in their fields, is intended for clinicians and researchers. It highlights the use of marginal donors as a comparatively novel source of transplantation organs and provides a thorough overview of marginal donors from their historical origins to recent clinical applications, including the state-of-the-art science of organ/donor management, procurement, and preservation.

### ***The Kidney Sellers: A Journey of Discovery in Iran***

by Sigrid Fry-Revere, 2014 • 254 pp • ISBN: 978-1-61163-512-6

One of the most contentious ethical issues surrounding transplantation today is the question of organ selling. Given the shortage of donated organs, should people be able to sell their organs either directly or indirectly? Today, organ selling is illegal in nearly all industrialized countries. One of the few that does allow it is the Islamic Republic of Iran. Until recently, that country's experience has gone largely unreported. But Sigrid Fry-Revere, a leading medical ethicist, traveled to Iran and observed how the market in organs functions in practice. Now in her new book, *The Kidney Sellers*, she describes her experience.

## Réparer les vivants

Par [Maylis de Kerangal](#)

Collection [Verticales](#), Gallimard, 288 pages, 2014.

«Le cœur de Simon migrait dans un autre endroit du pays, ses reins, son foie et ses poumons gagnaient d'autres provinces, ils filaient vers d'autres corps.»

*Réparer les vivants* est le roman d'une transplantation cardiaque. Telle une chanson de gestes, il tisse les présences et les espaces, les voix et les actes qui vont se relayer en vingt-quatre heures exactement. Roman de tension et de patience, d'accélération paniques et de pauses méditatives, il trace une aventure métaphysique, à la fois collective et intime, où le cœur, au-delà de sa fonction organique, demeure le siège des affects et le symbole de l'amour.
